## What is CMAT?

CMAT stands for Cardio-Metabolic Assessment Test. The CMAT is an innovative platform that provides you as a physician with valuable information regarding Cardio-Metabolic risk, the autonomic nervous system and the potential degradation of function resultant from a chronic health condition such as Diabetes, Atherosclerosis, Autonomic Nervous System Dysfunction, and many other conditions.

Utilizing our brilliantly designed hardware combined with powerful, easy-to-use software, you can get to the heart of your patient's health within minutes:

- Track the progression or regression of disease or complications
- Differentiate between vascular and neurological conditions
- Earlier detection of Insulin Resistance and Diabetes
- Detect early signs of stroke or heart attack with ease
- Evaluate patient's progress and response to prescribed therapeutics

### CLINICAL ADVANTAGE

- Strong clinical results for improved patient efficacy
- Exam is ideal for 60-70% of today's clinical patients

### PRACTICAL ADVANTAGE

- Easy to administer 7-minute, non-invasive exam
- Exam can be administered by any staff member

### FINANCIAL ADVANTAGE

- Covered by Medicare and comm. insurance
- Approximately \$400 per patient per test
- Retests supported by insurance
