

# Practice medicine, not management

- Maximize your collections with Meridian Medical Billing
- Reduce your time to payment
- Significantly improve your cashflow
- Spend more time with your patients
- Physicians Group Management

***Maximize collections, lower expenses  
and reduce your time to payment  
with Meridian Medical Billing***

**Mission Statement - To provide healthcare professionals nationwide a comprehensive solution to healthcare facility automation, billing and reporting, through the use of best-in-class service and state of the art technology.**

**One of the biggest challenges for physicians today is balancing the role between physician and business person.**

## Value Proposition

**Increased collections and lower costs through the use of highly trained staff, shared resources and IT infrastructure**

- High value-added business model
- Outsourcing back-office functions increases time with patient population and allows businesses to focus on growth
- Cloud-based PM software, integrated back-office services, and full EMR integration provide clients a fully integrated revenue cycle management solution**
- Revenue Cycle Management services platform manages entire billing process including data migration, claim submission, payment posting and denial follow-up. Back-office operations provide customers high level of personalized assistance by leveraging highly trained, customer dedicated, account executives
- Cloud based PM system provides total flexibility and interoperability with third party systems and gives customers full transparency over financial performance

## Billing Overview

**Physician practices across America face similar challenges. With decreasing reimbursements and increasing denial rates, practices are seeing a serious impact on their bottom line.**

**In addition, as insurance carrier and HIPAA requirements change, physicians are dedicating more of their time and resources to administrative tasks and red tape.**

→ Meridian Medical Billing is a leading provider of medical billing software and revenue cycle management services to healthcare facilities across the United States.

→ Meridian's Medical Billing solutions enable physicians to increase financial and operational performance, streamline workflows, and gain better insight through data, resulting in improved collections while reducing administrative burdens and operating costs.

**One of the biggest challenges for physicians today is balancing the role between physician and business person.**

**Meridian Medical Billing** enables you to eliminate all charge entry and patient demographic updates, as well as payment posting.

*A dedicated team of Account Representatives will enter all charges, perform claims scrubbing, post payments, bill patients, and most importantly, follow-up on all denials. In addition ...*

**Electronic and Paper Claims Filing** - Manage all data entry, claims and claims tracking for you. We have the capability to transmit claims electronically to thousands of insurance carriers.

**Claim Follow-up is a priority** - Our staff regularly follows-up on the progress of your claims to make sure you are receiving prompt, correct payments.

**Advanced Claims Review System** - Advanced claims scrubber identifies and corrects errors and omissions before claims are submitted. The results are reduced denials and faster reimbursement.

→ **EMR Compatibility** - Our software has the capability to integrate with any existing EMR system.

→ **Patient Invoicing, Collection, and Inquiries** - Monthly statements are sent to patients with remaining balances. Additionally, our dedicated staff handles all patient phone requests, billing inquiries, and necessary follow-up calls.

→ **Financial Reporting** - Provide your practice with financial and practice analysis reports available in the industry today. Custom reports can be generated at your request, and a wide range of standard reports are instantly available.

→ **Remote Access** - We provide internet access to all of your account information, giving you direct visibility over patient data, current charges and balances, as well as financial performance.

→ **Claim Adjudication** - Only 70% of the average medical practice's insurance claims are ever paid by carriers. We aggressively monitor and access EOBs and payments to ensure the highest possible reimbursement rate.
